Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from *Laboratory Manual: Containing Directions for a Course of Experiments in Organic Chemistry, Systematically Arranged to Accompany Remsen s Organic Chemistry* At the author s request I have carefully examined this Manual; and as a result I have recommended its publication, in the belief that it will be a valuable adjunct to my *Introduction to the Study of the Compounds of Carbon*. Great care has evidently been taken to determine the best conditions for each experiment; and, in many cases, the directions given are undoubtedly better than those given in my book. This is largely due to the fact that the author has, for a number of years, had charge of the work of preparation of compounds of carbon in a large laboratory; and he has therefore had an excellent opportunity thoroughly to test different methods, - an opportunity which he has well utilized. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
