Reviews

This publication is wonderful. It is amongst the most remarkable pdf i have got read. Its been written in an exceptionally basic way and it is merely after i finished reading through this pdf in which really transformed me, alter the way i really believe.
(Shayne Schneider)

IDENTIFICATION OF TROPICAL WOODY PLANTS IN THE ABSENCE OF FLOWERS

Birkhäuser Dez 2003, 2003. Taschenbuch. Book Condition: Neu. 24.4x17x cm. This item is printed on demand - Print on Demand Neuware - This field guide presents a new identification system permitting recognition of plant families in all seasons by means of morphological and macroanatomical features which are easily observable, permanent and which provide a great deal of taxonomic information. The identification system has been designed in the form of a dichotomous key highly illustrated by numerous figures and plates of woody plants showing their architecture and the morphological characters of barks, branches and leaves. Aimed at botanists and foresters, this field guide will help to identify families as well as important genera of trees and liana in the tropical rain forest. It alerts users to the rhythms, forms, odours and even textures of tropical plant world - a new perspective that constitutes a sensory approach to botany. 328 pp. Englisch.
