Iconcept Press, United States, 2014. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.Cardiovascular disease is a class of diseases that involve the heart or blood vessels, such as arteries, capillaries and veins. Cardiovascular diseases remain the biggest cause of deaths worldwide, though over the last two decades, cardiovascular mortality rates have declined in many high-income countries. At the same time, cardiovascular deaths and disease have increased at a fast rate in low- and middle-income countries. The causes of cardiovascular disease are diverse but atherosclerosis and/or hypertension are the most common ones. This book is targeted for researchers, scholars or other health care providers who need a ready reference for cardiovascular disease ranging from causes, signs and symptoms, and diagnosis through treatment and special considerations. There are two volumes. This book is the first volume. There are totally 12 chapters in this book. Chapter 1 proposes that the renal artery diameter could represents a marker of non-traditional cardiovascular risk factors in selected populations. A pathophysiological explanation, including main biophysical background, and clinical implication of this new finding has been critically discussed. Bicuspid aortic valve (BAV) is the commonest congenital cardiac disease and is characterized by the aortic valve only having two leaflets rather than the usual three. Chapter 2 provides a comprehensive review of the condition, from epidemiology and etiology to diagnosis and management. In the case of coronary artery disease, cardiomyocytes oxygen supply and thus the heart s contractility diminishes with the consequence that the oxygen demands of the whole organism are no longer fulfilled. Chapter 3 focuses on retroperfusion and it is shown that it is possible to perform a regional venous retrobypass in a long term pig model. Chapter 4 discusses the FGF23/Klotho system, which is a...
