Ch a p t e r 1 I N T R O D U C T I O N A properly designed roadway takes into consideration mobility and safety issues while addressing natural and human environmental aspects. To achieve such a balance, tradeoffs among these factors are routinely performed, either consciously or unconsciously. The passage of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) emphasized the importance of such roadway design. Practices that demonstrate such a design were compiled and documented in a report by the (1) Federal Highway Administration (FHWA) titled Flexibility in Highway Design. This document emphasized the existing flexibility in design criteria and encouraged the use of creative design in addressing site-specific project needs. Moreover, the need for project teams became apparent, because such creative solutions often require a cohesive effort among the planning, designing, and construction engineers. At the same time, the use of interdisciplinary teams and public involvement were also identified as integral components of successful solutions....
