

Diseases of Poverty: Epidemiology, Infectious Diseases, and Modern Plagues

Filesize: 7.96 MB

Reviews

An extremely awesome publication with lucid and perfect explanations. It is actually written in basic phrases rather than confusing. You will like how the writer publishes this book.

(Melody Jakubowski)

DISEASES OF POVERTY: EPIDEMIOLOGY, INFECTIOUS DISEASES, AND MODERN PLAGUES

DOWNLOAD

University Press of New England. Paperback. Book Condition: new. BRAND NEW, Diseases of Poverty: Epidemiology, Infectious Diseases, and Modern Plagues, Lisa V. Adams, John R. Butterly, Only a few decades ago, we were ready to declare victory over infectious diseases. Today, infectious diseases are responsible for significant morbidity and mortality throughout the world. This book examines the epidemiology and social impact of past and present infectious disease epidemics in the developing and developed world. In the introduction, the authors define global health as a discipline, justify its critical importance in the modern era, and introduce the Millennium Development Goals, which have become critical targets for most of the developing world. The first half of the volume provides an epidemiological overview, exploring early and contemporary perspectives on disease and disease control. An analysis of nutrition, water, and sanitation anchors the discussion of basic human needs. Specific diseases representing both "loud" and "silent" emergencies are investigated within broader structures of ecological and biological health such as economics, education, state infrastructure, culture, and personal liberty. The authors also examine antibiotic resistance, AIDS, malaria, tuberculosis, and pandemic influenza, and offer an epilogue on diseases of affluence, which now threaten citizens of countries both rich and poor. A readable guide to specific diseases, richly contextualized in environment and geography, this book will be used by health professionals in all disciplines interested in global health and its history and as a textbook in university courses on global health.
