*I just began reading this pdf. It is actually written in straightforward words instead of hard to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Excerpt: .article briefly, note the date and maker of machines (if visible) and remark on the general condition--how well the machine or other piece of equipment has been maintained and what per cent of the original service value remains, whether it is still an efficient type or so obsolete as to justify early replacement. The work is facilitated greatly if a regular form is provided, with proper columns for the various items mentioned and, in addition, columns for unit prices and totals. Such a sheet is shown in Form XL. It is eight and a half by eleven in size and should have a sufficient margin at the left to allow fitting into a standard binder. When the inventoring is completed and verified, the next step is to price the various articles. This is a task that requires the close attention of an expert. Before finally fixing prices, however, it is customary for the appraisers to consult with the factory manager or his engineer, as doubt often exists about the accuracy of figures, which only one intimately acquainted with the business can remove. FORMS XL and XLI: The larger form, an 8x11 sheet, allows space for the checker to note a description of machines and to describe their general conditions. Columns are supplied for the re spective values which are to t be added later. When running appraisals are operated, a record snowing at all times the remaining service value in each machine is kept on...
